

WINDOWS MADE TO LAST

At IRIS, we are passionate about creating uPVC window solutions that combine modern aesthetics, superior functionality, and unmatched durability. As a trusted name in the industry, we take pride in offering products that are not only beautiful but also energy-efficient and sustainable, making every space we touch a better place to live and work.

WELCOME TO IRIS INNOVATING SPACES, ELEVATING LIVES

At IRIS, we are passionate about creating uPVC window solutions that combine modern aesthetics, superior functionality, and unmatched durability. As a trusted name in the industry, we take pride in offering products that are not only beautiful but also energy-efficient and sustainable, making every space we touch a better place to live and work.

OUR MISSION

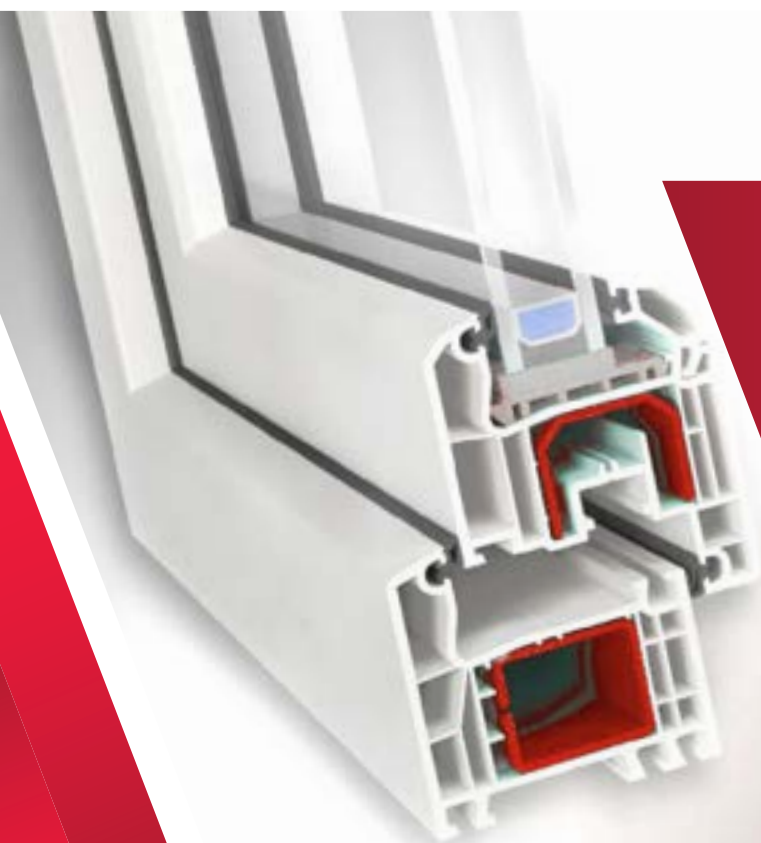

To deliver high-quality uPVC windows that enhance living and working environments through innovative designs, energy efficiency, and long-lasting performance, while contributing to a sustainable future.

OUR VISION

To be a leader in the uPVC window industry, setting benchmarks for design, quality, and sustainability, and becoming the preferred choice for homeowners, architects, and builders.

BUILT TO LAST

WHY CHOOSE IRIS?

Join Us in Shaping a Better Tomorrow

At IRIS, we don't just create windows; we create opportunities to connect with the world outside while protecting the comfort inside. Experience the perfect blend of style, performance, and sustainability with us.

Superior Durability

Our windows are designed to withstand the harshest weather conditions, resist everyday wear and tear, and maintain their strength and appearance over time. Engineered with high-quality materials and advanced technology, they provide superior durability against extreme heat, heavy rains, strong winds, and UV radiation.

Energy Efficiency

Our windows are engineered to enhance energy efficiency by minimizing heat transfer, reducing the need for artificial heating and cooling. With advanced insulation properties, they help maintain indoor temperatures, keeping spaces cooler in summer and warmer in winter. This reduces reliance on air conditioning and heating systems, leading to lower energy consumption and utility bills.

Low Maintenance

Our windows are designed to retain their beauty and functionality with minimal effort. Made from high-quality, durable materials, they resist fading, warping, and corrosion, even in extreme weather conditions. Unlike traditional wooden or metal frames that require frequent painting, polishing, or rust treatment, these windows need only occasional cleaning to maintain their fresh, elegant appearance.

Custom Designs

Custom designs offer personalized solutions that cater specifically to individual preferences, styles, and functional requirements. These tailored designs go beyond standard or off-the-shelf options, ensuring that every aspect, from materials and colors to layout and details, is crafted to suit the unique tastes and needs of the client.

Noise and Weatherproofing

Noise and weatherproofing focus on creating a peaceful and comfortable environment by blocking out external disturbances. Noise-proofing uses materials like sound-dampening insulation and sealed windows to minimize unwanted noise, while weatherproofing shields the space from rain, wind, and extreme temperatures.

ELEVATING LIVES

WHAT TO KNOW BEFORE BUYING UPVC WINDOWS

Steel Reinforcement:

Opt for frames with internal reinforcements, such as galvanized steel or aluminum, to enhance the structural strength and durability of the windows.

Energy Efficiency:

Look for energy ratings or certifications. Consider windows with thermal breaks for enhanced energy savings.

Drainage:

Ensure the windows are equipped with built-in drainage systems designed to channel rainwater away efficiently.

Warranty:

When purchasing uPVC windows, ensure that the manufacturer or supplier provides comprehensive warranties covering the frames, glass, and hardware components.

Customization:

Consider the wide variety of colors, textures, and designs available for uPVC windows to ensure they complement your home's interiors and overall aesthetic.

Quality of uPVC:

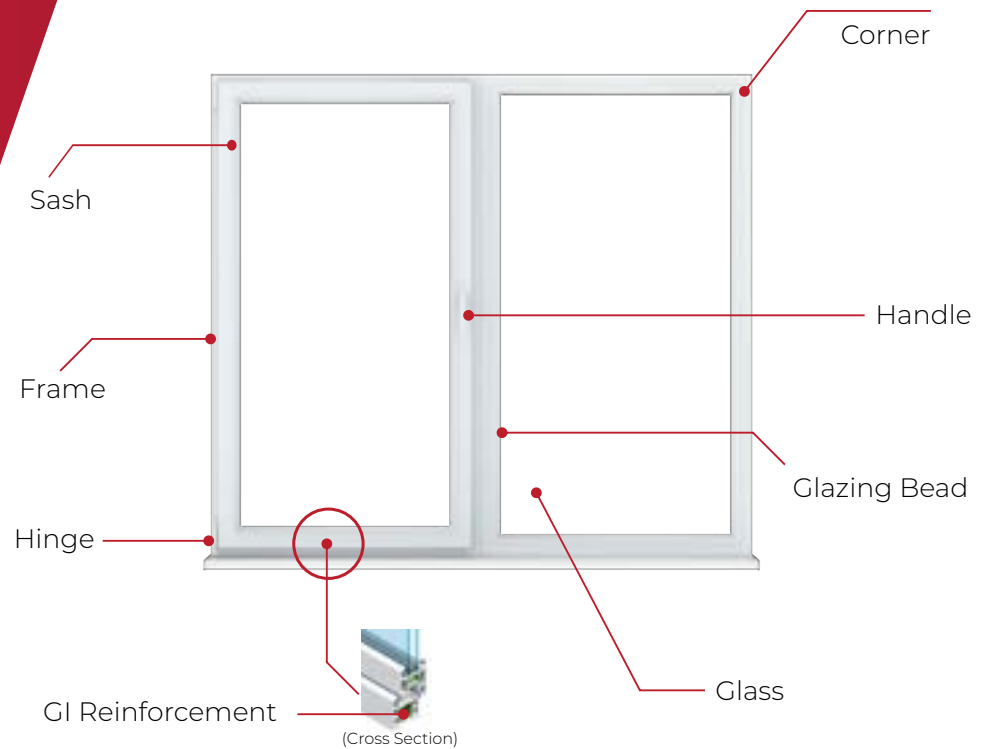

Ensure the uPVC used is high-quality, lead-free, weather-resistant and UV resistant to avoid discoloration and damage from sunlight.

Glazing Options:

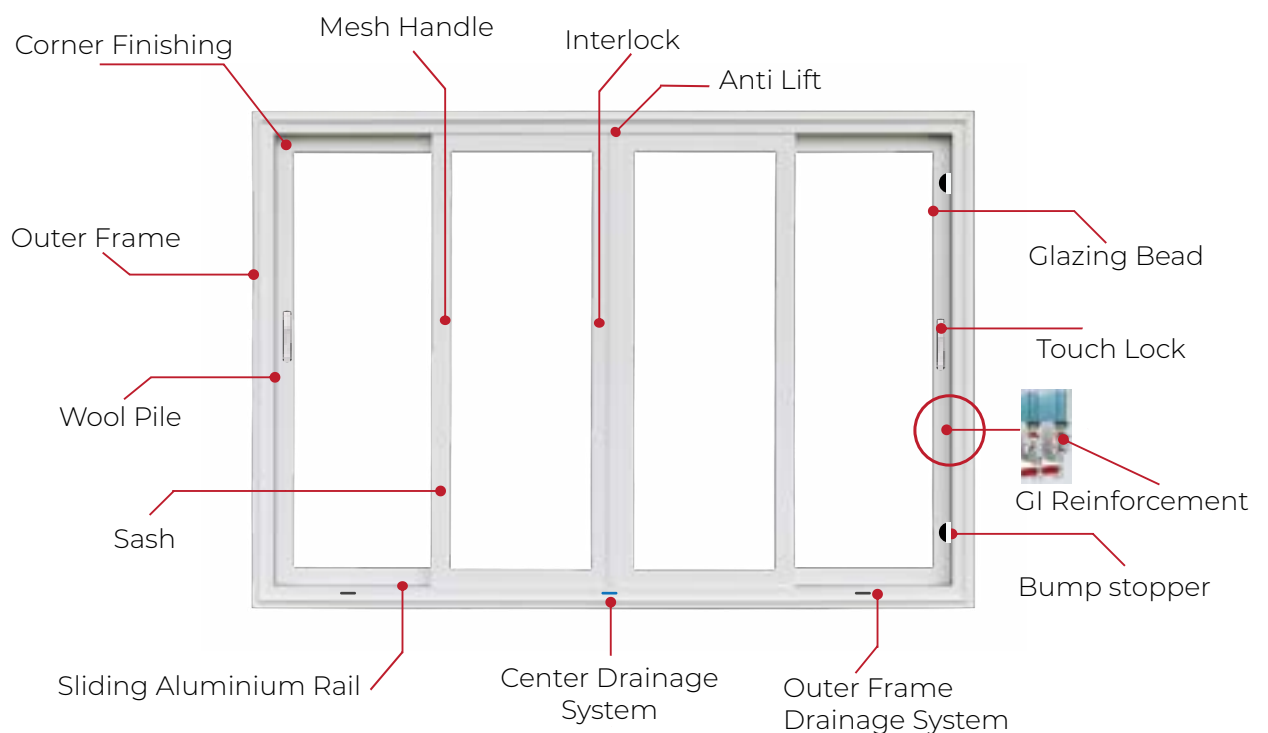

Single Glazing: Basic option for minimal insulation. Double Glazing: Better thermal and sound insulation.

CASEMENT WINDOW

SLIDING WINDOW

CASEMENT WINDOWS

Classic Elegance, Modern Functionality

Our casement windows are a timeless choice for those who value elegance and efficiency. Designed to open outward with ease, they provide superior ventilation and unobstructed views.

Features:

- Excellent sealing for noise and weatherproofing
- Flexible opening options (side-hung, top-hung)
- Energy-efficient and durable

SLIDING WINDOWS

Sleek and Space-Saving

IRIS sliding windows combine style and practicality in a compact design. With smooth-gliding mechanisms, these windows are ideal for modern living.

Features:

- Space-saving design for tighter areas
- Smooth operation with high-quality rollers
- Excellent noise insulation and weather resistance

COMBINATION WINDOWS

Versatile and Customizable

Our combination windows are tailored to meet your unique needs by combining different window types in one design. They offer the flexibility to create the perfect balance of style, functionality, and ventilation.

Features:

- Customisable configurations to suit any space
- Combines casement, sliding, and fixed panels
- Seamless integration with any architectural style

SPECIAL WINDOWS

Unique Designs for Unique Spaces

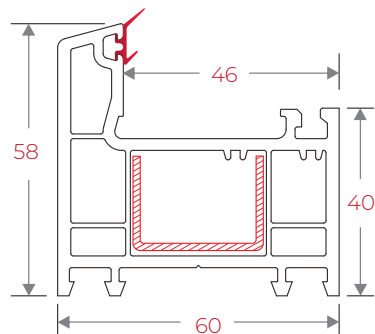

At IRIS, we understand that some spaces demand extraordinary solutions. Our special windows are designed to add a distinctive touch to your interiors and exteriors

Features:

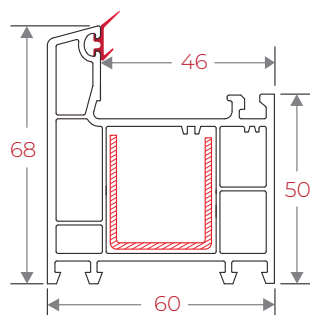

- Custom-built designs for exclusive projects
- Tailored to suit architectural challenges or specific needs
- Available in various shapes and configurations
